

Dear Parents,

This week Nursery continued to surprise us with their creativity. They have been really interested in dinosaurs and some of them spent a long time creating props and gadgets around this topic. They made telescopes to observe the dinosaurs and tails to add to the uniform so that the children could become dinosaurs themselves. We had a nice big tray full of different dinosaurs and some children had fun playing their own Dino trivia. Their knowledge and enjoyment of the topic is fascinating.

On Monday the children had a chance to see the Year 6 rehearsal for their Leavers Presentation and they all really enjoyed the story of Mrs. Poppowitz flying in to Etz Chaim and learning about everything the Year 6 children did during their time in Etz Chaim.

The children also enjoyed making some Cornflake Cakes for the Jewish Care Baking day on Tuesday. It was a messy and really yummy activity that helped them to acquire new cutting and measuring skills. The children also continued measuring in various independent ways, with some of them making their own measuring tapes and using other Maths resources to measure a range of objects and people in the classroom. It is lovely to hear their vocabulary growing around measuring as it is something they are all very interested in.

This week Nursery started to learn to say להתראות - (lehitra'ot) – see you/goodbye, שבת שלום - (Shabbat shalom) 'Peaceful Shabbat'. Nursery started to learn the song שבת שלום 'Shabat shalom' which you can find on the link: <https://www.youtube.com/watch?v=VCMBkxr2WSc>.

During the Jewish Studies lessons, the children continued learning about Kosher animals, this time around birds.

As it is the end of the year, we will need all the library books back to make sure we didn't miss any. Please make sure any missing books are returned.

Many Thanks

The Nursery Team
