

Dear Parents

The children started the week with exploring colour by mixing paint. The children loved pouring the paint on cling film on the table. They especially liked peeling off the cling film and seeing that the table was still clean. On Monday they made playdough with powder paint, and then used the powder instead of flour to stop the table from being sticky.

A few of the children asked to put the sea creatures in ice trays, we put them in the freezer and the next morning they were ice! The children worked out that if they rubbed the ice then it would melt. The more the ice melted the more water there was, and the children put their ice in the water which also melted it.

This week was Road Safety Week. The children practised crossing the road on our role-play zebra crossing in the Foundation Stage playground. They then crossed the road on Thursday with Reception and the Junior Travel Ambassadors from Year 6. The children knew where to cross, that they needed to hold hands and to stop, look and listen.

The children have learnt up to number 7 with the number blocks. They have continued to make the number blocks with unifix cubes and collage materials. Next week they will learn 8, 9 and 10.

Kindness is so important we have continued our project on Avraham. We have made our own Avraham display and talked about what is kindness. We have also made challah as this week's Parasha is Chayei Sara and we celebrate the life of Sarah Imanu. The children are amazing and have now started to plait their own challot - very impressive!

This week Nursery learnt the words הוא (Hu – he) and היא (Hee – she). The class is learning the song טוב בוקר. You can find the songs on <https://www.youtube.com/watch?v=RAbDQApVHBk>

Please can all library books be returned to school on Monday, there are a number of outstanding books and we are updating the system. Some children's books have already been collected this week. New books will be sent home on Monday.

Shabbat Shalom
Nursery Team
